

Stop Telling Start Inspiring

Whether you are a **thought leader** or a **leader of people**, sharing your ideas and vision is crucial to influencing others to take action.

Effective communication is more than just saying words. Poorly communicated information costs companies millions per year and individuals opportunities to advance.

Inspiring and moving people to action requires much more from you than words. People **want** to be informed, and **need** to be inspired. Both must happen.

Executive communication coaching will refine your skills. The coach will provide **awareness of how others see and hear you**. Ultimately, the coach helps ensure you and the audience have the same inspiring experience.

Coaching will help you:

- **Influence** with audience-centric messaging
- **Interact** to increase engagement (virtual or in-person)
- **Build** credibility with the teams you lead
- **Drive** informed decision making
- **Demonstrate** executive presence
- **Respond** to challenging questions
- **Advocate** for critical issues
- **Listen** to incorporate the ideas of others
- **Collaborate** to achieve organizational objectives
- **Inspire** others to follow your vision

A LOOK INSIDE THE COACHING PROCESS

Diagnose

- Collaborate with the coach on specific goals and objectives, and potential impediments to achieving them
- Coach assesses your communication style

Coach

- During your coaching sessions, you will work on one or more key communication situations. The coach will recommend specific changes to help you meet your goals and objectives
